- *Premium-level support with Crestron Flex Care (optional)*
- *Enterprise-grade security - connects and communicates securely over any enterprise or SMB network*

The UC-MX70-T system provides a complete video conference room solution for use with the Microsoft Teams Rooms intelligent communications platform. It supports single or dual video displays[1], and features the Crestron Flex tabletop conference device (CCS-UC-1-X), UC Bracket Assembly with UC-ENGINE (UC-BRKT-250-P-T-ASSY), an enterprise-grade camera (UC-CAM-HD-520), mic pod (CCS-UCA-MIC), cables, and power supply.

Native Microsoft Teams® Rooms Experience

The UC-MX70-T system brings the full Microsoft Teams Rooms UC experience to any meeting space in an enterprise or SMB facility, whether implementing a cloud based Microsoft Teams Rooms deployment, on-premises Skype® for Business software, or a hybrid of the two.

Intuitive User Interface with Impressive Audio

The Crestron Flex tabletop conference device (CCS-UC-1-X) provides a superior conferencing and collaboration experience with its large 7 in. HD display, integrated 360° quad microphone array, and an AEC-enabled USB speakerphone that supports full-duplex wideband audio performance.

Simplified Deployment

The UC Bracket Assembly (UC-BRKT-250-P-T-ASSY) provides preassembled components on one ready-to-mount bracket to simplify installation. The assembly can be mounted on a wall, or it can be attached to the rear of the display device. Crestron's direct connection method further simplifies installation with a single connection from the Flex tabletop conference device to the UC Bracket Assembly.[2]

High-Definition Video Conferencing

The included enterprise-grade camera (UC-CAM-HD-520) features a wide-angle 82° diagonal field of view to capture the conference room in Full HD 1080p video resolution. High precision aspherical optics, super low light 2M pixel sensor, and advanced video processing ensure a clear video image free from light or noise artifacts.

Crestron Control System Integration

The Crestron Flex tabletop conferencing device can integrate with a Crestron control system to enable touch screen control of room lighting, motorized window shades, climate control, AV, and other amenities.[3]

Bring Your Own Device (BYOD)

Conference room visitors can connect their laptop to the Crestron Flex system to use their own UC conference platform. The UC-MX70-T's built-in content ingest device switches to the connected laptop's UC platform and returns to the native Microsoft Teams Rooms platform when disconnected.

Enterprise-Grade Security

Crestron Flex is an enterprise-grade solution, engineered in partnership with Microsoft® to integrate seamlessly into any Microsoft Teams Rooms or Skype for Business software deployment. Crestron Flex is ideally equipped for mass

deployment throughout any sized corporate, university, medical, military, or government facility. Its advanced security features ensure privacy, reliability, and compliance with your organization's IT policies.

Easy Provisioning and Device Management

The XiO Cloud service[4] is an IoT cloud-based provisioning service that enables installers and IT managers to easily deploy and manage thousands of devices. The XiO Cloud service allows for system alerts, network management and provisioning, and the pairing of a control device to the system's UC Engine. System updates are controlled by Windows® software update.

Visit www.crestron.com/xiocloud for additional information.

Premium-Level Support

Crestron Flex Care is an optional subscription service that automatically renews annually, providing 24/7 live remote technical support, an extended five year warranty on Crestron® hardware, expedited advance replacements, and a discounted rate for on-site support.

Visit www.crestron.com/flexcare for additional information.

Dual Control Option

A TS- or TSW- series 7 in. or 10.1 in. touch screen may be added to the UC-MX70-T kit as an additional control point for the Microsoft Teams Rooms environment.[2, 3]
